

E.J. GARLAND NOMINATED

E. J. Garland, former member of Bow River, was again nominated as the P. A. convention held yesterday in Calgary, to contest the seat in the coming election. He was supported by several names being brought before the convention. But Mr. Garland and E. J. Garland, former member and candidate for Assiniboia, withdrew the nomination, which was full of hot passions and heated more than four hours.

Officers of the constituency association elected by the convention are: President, Donald Sinclair; first vice president, M. C. Buckley; second

The storm which passed over Glen last Wednesday evening played a most peculiar piece of trickery on Platte at his father's home east of town. Just before the storm broke out at that time no rain or hail had fallen, he opened the door when a big piece of ice struck him on the side of the head and knocked him down. The floor and he had to be assisted by his feet so severe was the blow. An electric hand saw broke the door step with such force that it left it impaled on the step. Soon after this rain and hail started and the next morning Mr. A. Platte stated he estimated a loss by hail of about \$100.00 out of 100 acres of wheat that he estimated before the storm would have yielded from 35 to 40 bushels to the acre.

CALIFORNIA STRAIGHT AHEAD

Saturday, August 14th

An elaborately built bungalow on wheels, and an entire caravan of typical tourists was part of the cast of "California Straight Ahead," the Universal-Jewel picture starring Reginald Denny, which will be shown at the Gleichen Community Hall next Saturday night, August 14.

Most of the picture takes place out on the open road, with Denny in the role of a disconsolate actor trying to forget the fact that his fiancée had changed her mind. He scours the country in the palatial honeymoon trailer he had built with which to take his bride to California.

Henry Pollard, who directed the picture spent a week in picking representative types of motor tourists to accompany Denny.

The picture, from a story by Byron Morgan and Pollard, follows the life of the auto camper from coast to west coast, through all manner of trials and tribulations, including getting into public camp grounds, throwing and engine trouble, with a thrilling finish in Los Angeles, where Denny has to drive the good grade of his bride by driving her father's racing car in the famous Auto Track handicap.

Denny in "California Straight Ahead" is reported to have found a good deal in his ability as a light comedian.

ONLY TOO TRUE

The Calgary Morning Argus in a recent editorial says:

The day of the election is more than one month distant. The campaign has really but begun. The zenith, the crux of the contest has not been reached. Yet already the scandalous and disgraceful nature of the fight for power, its bitterness and its extravagance, surpass any other campaign in Canadian history. Our political life at its lowest ebb. Villification, charges and counter-charges, personalities, base and subtle suggestion are the weapons of this unhappily the day.

Cannot a bell be called? Cannot the sane and clean and moderate spirit which the Canadian people assert in provincial campaigns be asserted in this federal campaign to elect a government?

Check the election campaign for party hacks? This campaign is a disgrace to the great body of Canadian electors. Its bitterness and its filth are alien to our character. We expect more dignity and more honor from the men who seek our franchise.

The time has come in this campaign to change its character, to restrain its extravagance, to elevate its tone.

CROP REPORT

The weekly crop report from Winnipeg states that harvesting is fairly general in Manitoba with return up to expectations, according to the C. P. R. Average yields are indicated from Saskatchewan and Alberta.

Light showers to heavy rains are reported from Manitoba but a further precipitation will benefit the oat and barley crop now ripening. Cutting of wheat is now fairly general and returns from threshing are up to expectations and are proving well.

There is no evidence of any serious damage by rust. A survey of the situation indicates a good average yield of wheat and oats with a fairly fair one. The heavier grain yields being in the southern part of the province.

Liberal rains fell during the week over most of the province. A considerable amount of damage to the wheat was felt early in the week in the areas adjacent to the Standard, Chancellor, Taylor, and Hume with the Trezona subdivision; Gleichen subdivision, with a loss of from five to six hundred per cent. When cutting is completed, barley has begun and rye is completed. Cultures in the Province have improved owing to the rain and promise of good average yields, with those north of Red Deer the best 1926.

Good rain at intervals improved the crops along the Edmonton, Dams and British Columbia Railway but delayed cutting. There is an ex-

cellent outlook for a much better than average crop this year, and cutting is expected to begin within a week.

It is believed the submarine contains the bodies of 22 sailors.

Equal Political Rights

British Women Aim to Fight For Franchise

British women are about to open a strenuous fight to do away with present suffrage laws which exclude them from the right to vote until they are 30 years old.

Many prominent men have agreed to sign a great mass meeting setting forth women's suffrage in the interest of equal political rights.

They are Lord Bessborough, Lord Cecil and Frederick Lawrence, M.P.

George Bernard Shaw, the noted playwright, however, has declined to participate.

Under the present suffrage laws in England, 5,000,000 women have the vote, 21, but women under 30, who are unable to vote, have qualified men above the age of 21 have the franchise.

All the old time suffrage leaders and thousands of other prominent women reveal this discrimination.

Fail To Scale High Peak

Mountain Climbers Experience Hardships in British Columbia

Reputed by British Columbia's 12,000 "mountain" industry men as the "22-hour struggle for life" among the snow-capped and icy heights of the Selkirk range, the mountain climbers have been making a record.

The climbers reached an altitude of 30,000 feet on June 25.

Canada Reverts to Gold Standard

Canada has gone over to the gold standard. "Reverts to gold," says the standard. "Reverts to gold," says the standard. "Reverts to gold," says the standard.

It is rather a curious fact that the three popular beverages, tea, coffee and cocoa, all were introduced into Europe within a few years of each other.

To Make Film At Jasper Screen Feature Portrayed in Magnificent Settings of Canadian Rockies

Jasper, the world's largest national park is to provide the setting for one of the great motion picture epics of the year. The "Country Beyond," an adaptation of the story of the name by James Oliver Hume, is being produced by the Fox Film Corporation under the personal direction of Irving Cummings. The cast, which is a notable one, includes such stars as Ethel Barrymore, J. P. Harrington, Fred Kohler and Lawrence Lister, and a number of other outstanding actors.

Two sections of the park have been chosen for this play. Recently the company started work beside the lake waters of the Lake of Fortuque, which lies in the shadow of Mount Eliza. There about Jasper Park Lodge, on the shore of Lac Beauvert, the preliminary work has been carried out. Later the entire company will move by pony trail to Malaga Lake, where the remainder of the picture will be filmed.

It will be a costly venture, and it calls for an expenditure of at least a quarter of a million dollars. The picture has Hollywood come so far north to find a picture. This is the first time that the motion picture industry that a complete screen feature has been produced north of the international boundary.

Blames Spout For Rheumatism French Priest Anatomizes Bays Sunspots Increase This Trouble

If your old rheumatism interferes with your golf or a bothersome tooth starts aching again, blame the sunspots. The French priest, Father Maurice, anatomizes the weather of seasons in France, is the chief advocate of a theory which connects the complaints of earthly beings with phenomena of the sun.

The above said that he was surprised that these seasons increased the bother of rheumatism and neuralgia of humans.

"Electricity acts directly on our nerve cells," he concluded. "Our own bodies, like those of lower animals, are subject to additional nervous excitement such as that caused when electric shocks or by the sun's atmosphere and electricity in our bodies."
